

Welcome to our Public Exhibition

Thank you for taking the time to attend our consultation event. We are seeking your views on the preliminary design for a wind farm proposal that we are exploring at Kinnelhead, approximately 6km southwest of Moffat in Dumfries and Galloway.

RES believes in meaningful and effective consultation, and we aim to engage early with the local community and key stakeholders in order to facilitate constructive consultation. This helps to identify issues and concerns, as well as benefits and opportunities, which we will consider when developing and refining the design and delivery of the proposal.

This exhibition forms part of our pre-application consultation. We have provided a range of information, including details of the site location, design layout, proposed infrastructure, site constraints, likely turbine delivery route, and environmental considerations.

In addition, we have provided visualisations comprising wirelines and photomontages to help give an impression of how the current site design and layout may appear from different viewpoints.

We consider pre-application consultation a crucial part of the wind farm development process.

This early-stage exhibition is designed to give you the opportunity to:

- learn more about the proposal
- discuss any questions or views with our project team
- provide written feedback to RES on the proposal.

Please take time to read the information provided and talk to our project team about any questions that you may have. All consultation feedback submitted to RES will be reviewed by the project team over the coming weeks as we continue the design process.

Planning submission timescales

The Kinnelhead Wind Farm proposal will have an installed generating capacity greater than 50MW (megawatts). This means that the application for planning consent will be submitted by RES to the Scottish Government's Energy Consents Unit under Section 36 of the Electricity Act 1989 (the Electricity Act) and determined by Scottish Ministers. We currently expect to submit the Section 36 application in mid-2026.
