

Commenting on the proposal

Thank you for taking the time to find out more about our proposal for Kinnelhead Wind Farm.

This exhibition initiates a consultation period being run by RES to gather comments and feedback on the proposal. We are keen to discuss the project with you and answer any questions that you may have but, please note, that formal feedback to RES at this stage needs to be submitted in writing.

If you would like to provide feedback to RES on the project you can do so by:

- Completing a form at one of the events and handing to a member of the team
- Scanning the QR code or visiting our website, to submit your feedback there
- Sending a form to rebecca.randall@res-group.com or Third Floor STV, Pacific Quay, Glasgow G51 1PQ

Your feedback matters

Feedback at this early stage has the potential to change and influence the design and improve the overall quality of the planning application from a community perspective.

In addition to confirming any current support, opposition, or neutrality to the proposal at this stage, please consider submitting any constructive feedback that you may have regarding the design and delivery of the project. Any written consultation feedback

submitted to RES will be considered by the project team over the coming months as the design is developed and refined, in addition to feedback from key consultees and the findings from the technical and environmental studies that we are undertaking.

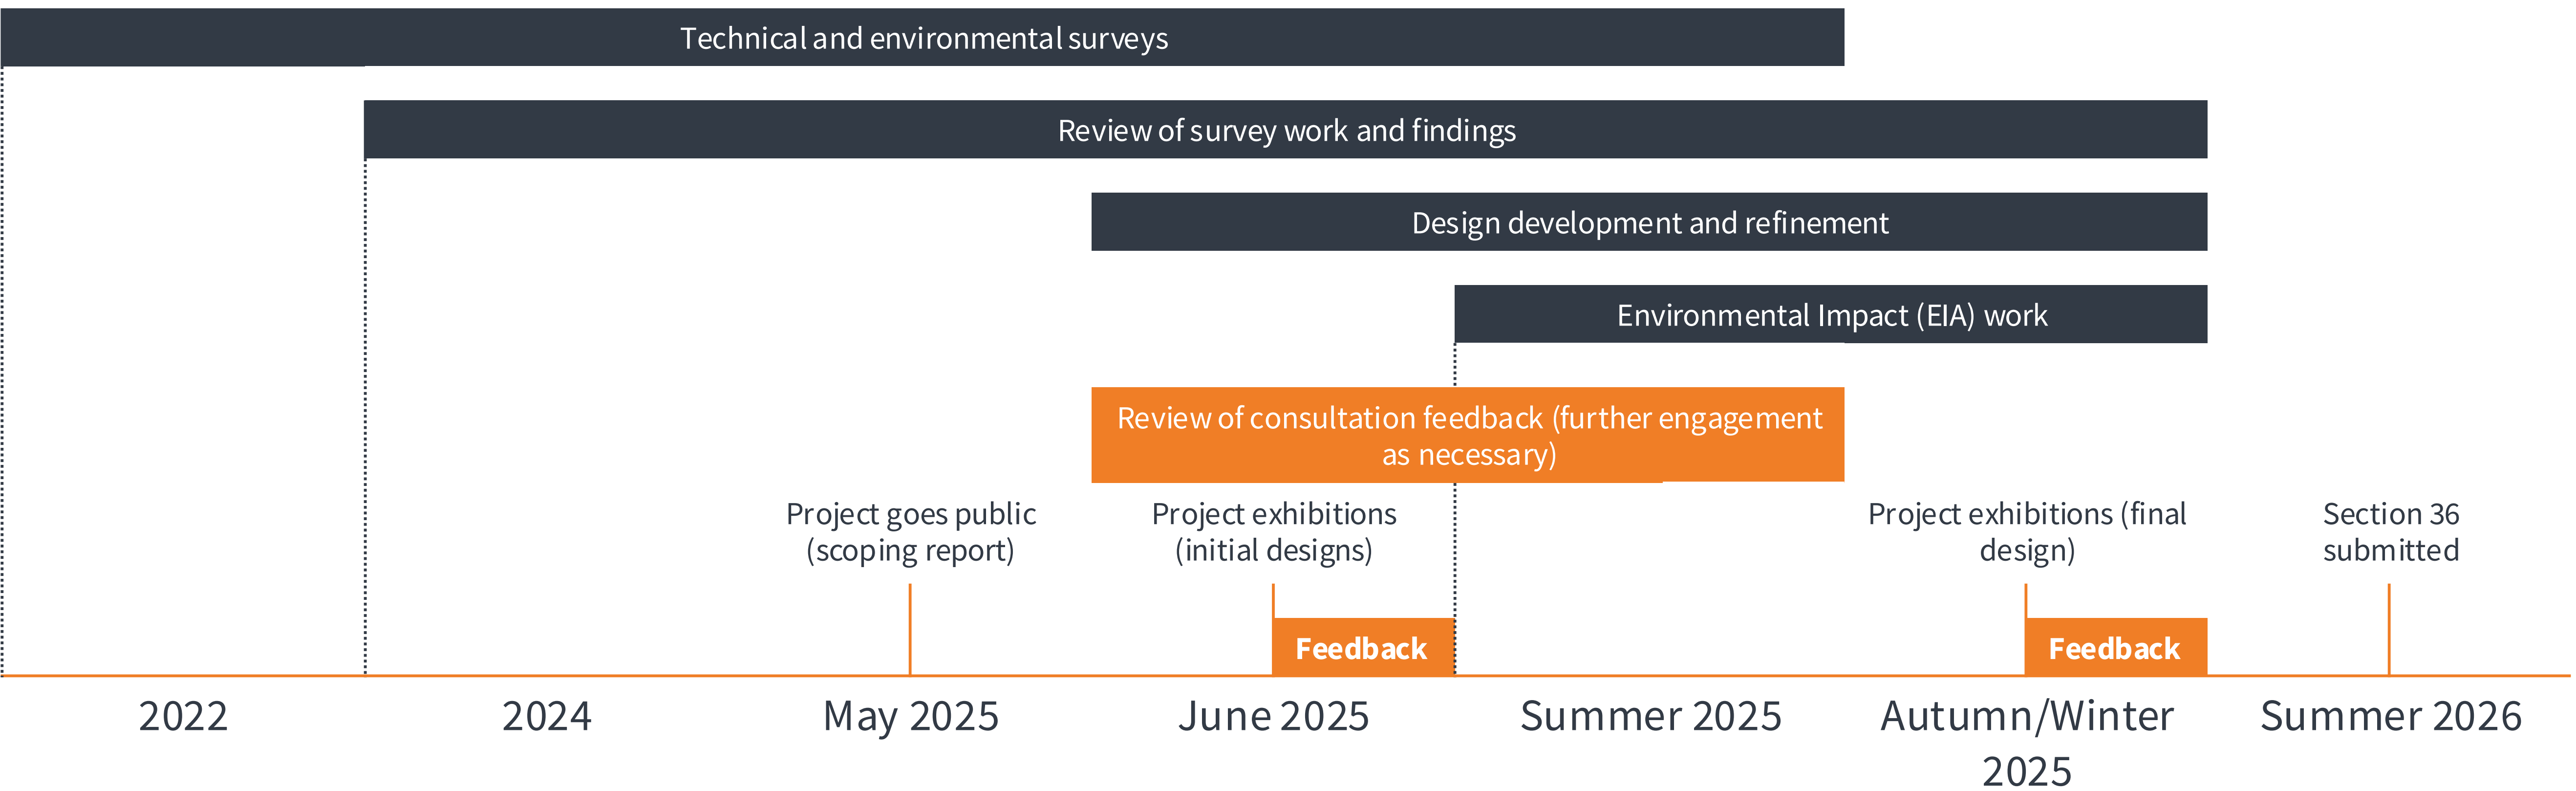

In addition to gathering feedback on the proposal itself and current design, we would also like to understand how the wind farm could support local priorities through the delivery of a tailored community benefits package. The closing date for written feedback to RES is **Friday 4 July 2024**.

Please note that comments to RES at this time are not representations to the determining authority (The Scottish Government’s Energy Consents Unit). There will be an opportunity to submit representations to the determining authority should an application be submitted.

Keeping you updated

We will hold a second set of public exhibition events closer to the submission of the planning application (which is currently scheduled for spring next year) to update people on the proposal and present the final design. These events will also refer to the written feedback received from the June 2025 exhibitions and consultation period.
